- The CIF provided by the CCDC uses a non-standard setting of space group  $P2_12_12_1$  #19, but uses the coordinates provided by (Hordwick, 1961). This produces a somewhat different structure than we present. We find no evidence that (Hordwick, 1961) used a non-standard setting, and our interatomic distances agree with the published numbers, so we will use the standard setting.
