- (Hermann, 1937), assigns the *Strukturbericht* designation *B*15 to this structure. This was superseded by the current *B*27 structure in (Gottfried, 1937). Here we follow (Parthé, 1993), who prefers the *B*27 designation.
- FeAs (*B*14), GeS (*B*16), FeB (*B*27), SnS (*B*29), MnP (*B*31), and η -NiSi (*B*_d) all share the same AFLOW label, AB_oP8_62_c_c. The structures are generated by the same symmetry operations with different sets of parameters (`--params`) specified in their corresponding CIF files.
